

EU Project Communications Manager (80-100%)

We are looking for an experienced EU project communications professional to lead communication, dissemination and exploitation activities in Horizon Europe projects to join our international team at our office located in Zurich. You will be responsible for planning and implementing science-related information through multiple channels, including print, digital, and social media. Thanks to new projects, we are looking for science communications specialists to join our multidisciplinary team. We are searching for candidates with a proactive approach, strong communication skills, and creativity. Apply now, and you may soon be working with scientists at the best universities and innovative companies across Europe.

Who are we?

We are [accelopment Schweiz AG](#) in Zurich. Our multidisciplinary team supports scientists, universities and technology-oriented companies regarding their participation in EU funding programmes for research and innovation. Our focus is on the EU research and innovation (R&I) framework programme "Horizon Europe" and our services range from funding advice and project application to project implementation. As a team, accelopment participates in EU-funded projects as a partner for project administration and communication, as well as for the exploitation of project results.

Who are we looking for?

Have you worked in communications and dissemination of EU-funded R&I projects? Do you have broad skills in digital tools to develop and design visual content? Does research fascinate you as much as innovative companies that are shaping our future? Do you find it exciting to be a sparring partner for European proposals and projects across multiple disciplines and cultures? Then you could be a good fit for us.

What are your tasks?

Communication of EU-funded R&I projects is at the heart of your work and involves the conception, planning and implementation of communication, dissemination and exploitation strategies and measures, especially for projects in the Horizon Europe programme. The creation of print and digital materials belongs to your tasks just as writing articles and setting up websites. Additionally, you develop the communication, dissemination and exploitation related sections of the EU grant applications. You work and communicate with project partners across Europe, mainly in English.

What are our requirements?

In addition to developing communication strategies as well as creating and implementing online and print communication material, we expect the following from you:

- Current or prior participation in Horizon projects in a similar role. This is an essential requirement.
- Experience with science and technology communications (e.g. press releases, websites, video creation).
- University degree in Communications or other relevant areas with more than 5 years of work experience.
- Familiarity with graphic design software and video editing tools (e.g., Adobe Creative Suite).
- Excellent IT and multimedia content creation skills (MS Office, website CMS such as WordPress and other digital communication tools).
- Strong communication skills, high level of initiative and commitment, detail orientation and flexibility.
- Excellent written and verbal communication skills in English, German language skills are added value.

What are your advantages?

An attractive workplace in Zurich is awaiting you. Your working hours are flexible, and you have the opportunity to contribute to the corporate development of our company and work in an extremely exciting environment at the pulse of scientific progress.

How can you apply?

Please state your specific Horizon Europe project communication experience clearly in your cover letter and CV.

Applications without this experience will not receive a response.

Send your complete electronic application, including cover letter, CV and example materials you created and a list of EU projects you contributed to, to jobs@accelopment.com. For questions, please call Julia Goetz at +41 44 455 66 05.
